# BAR CHART

A bar chart plots numeric values for levels of a categorical feature as bars.
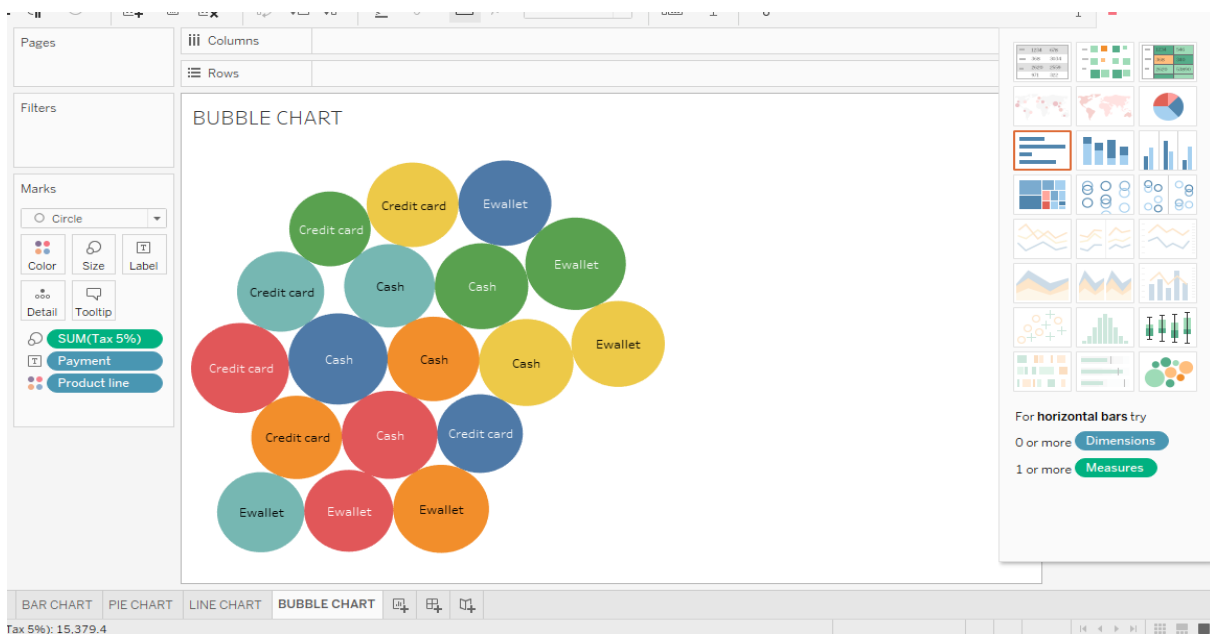

PIE CHART

A pie chart represents data as slices of a circle with different sizes and colors
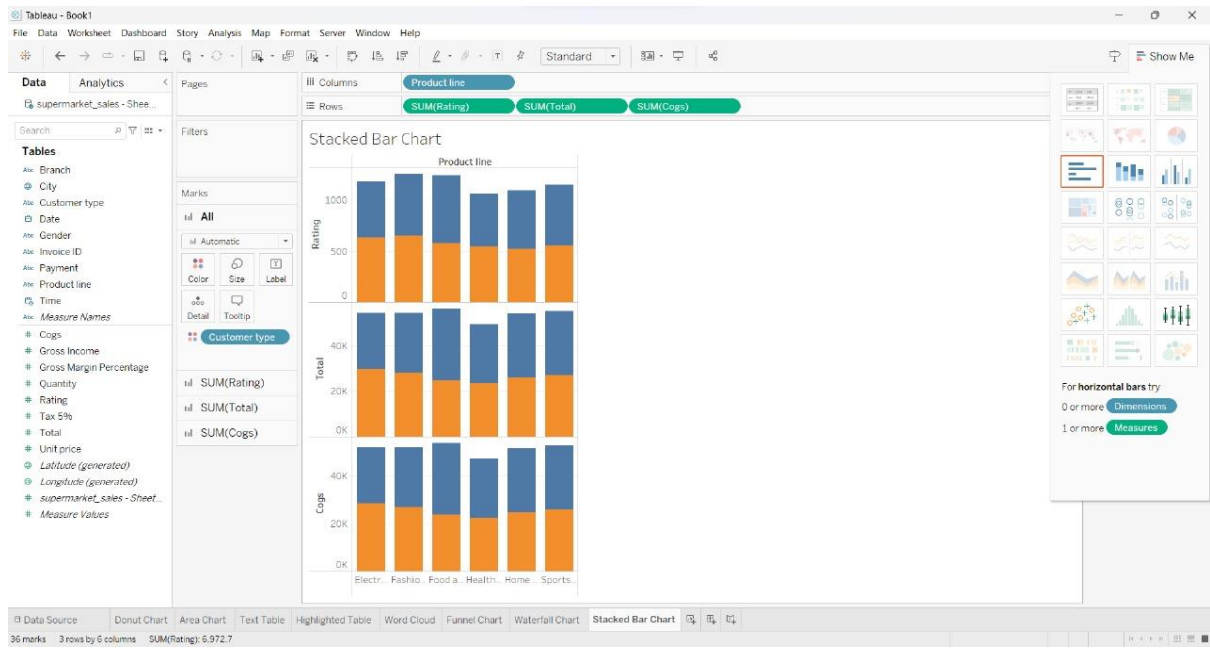

LINE CHART

The Tableau Line Chart is a visualization option where the two axes of a graph represent the dimension and a measure are plotted together

BUBBLE CHART

This chart is used to show the relationship between two or more variables.

STACKED BAR CHARTS

This chart is used to compare the categories of data while allowing us to break down and compare parts of a larger picture
